Assistive Technologies for People with Dementia: Personal Review

Kiyoshi Yasuda. Speech & Language therapist Aug.6. 2020

Osaka Institute of Technology / Kyoto Prefectural University of Medicine / Saiga Clinic

Table of Contents (Simple version & Detailed version)

Table of Contents (Simple Version)

Chapter 1 Memory and its memory impairments

2 Dementia and assistive Technologies

3 Low Tech Interventions by Non-electronic Tools (Memory Aids)

4 Low Tech Interventions : Assistance by Electronic Devices

5 Various Non-pharmacological Approaches

6 Reminiscence Therapy and ICT

7 Music Therapy and ICT

8 Therapy for Communication and ICT

9 Daily Assistance by High Tech Interventions

10 Daily Assistance by Virtual Agents and Robots

11 Assisting Dog for People with Dementia

Table of Contents (Detailed Version)

Chapter 1 Memory and Memory Impairments

1.1 What is Memory

1.2 Classifications of memory

Baddeley's Theory

Episodic memory

Function and Lesion of Episodic Memory

Semantic Memory

Impairment of Semantic and episodic memory

Working Memory

Anterograde Amnesia (Bauer, 2008)

Prospective memory

Retrograde Amnesia

Source Amnesia

Meta-memory and "Feeling of Knowing"

Basal forebrain amnesia

Procedural Memory

The Semantic Memory Remain in the Elderly

Procedural Memory Shows Little Decline

Age-related Memory Declines

The Types of Memory to be Impaired in Dementia

1.3 Dissociation between Episodic and Semantic Memory

Case Reports of episodic and Semantic memory impairments

Case Reports with Opposite Pattern

Lesion of Semantic Memory

Lesion and Sub-categorization of Semantic Memory

1.4 Evaluation for Dementia, Proper Names and Discourse

Anomia for Proper Names

Why are peoples' names difficult to retrieve

Declining Memory for Discourse

Memory for Single Radio News

Memory of Serially-presented Radio News

Memory for 30 min. Discourse

1.5 References

Chapter 2 Dementia, and Assistive Technologies

2.1 Symptoms of Dementia and Pharmacologic Treatment

Number of Dementia Patients

Type of Dementia

Pharmacological Treatment for Dementia

Pharmacological Treatment for BPSD

Symptoms and Progression of Dementia

Mild Cognitive Impairments

The Early Stages of Dementia

The Mild to Moderate Stages of Dementia

2.2 Evidence of Dementia Prevention theory & Brain Activation theory

Can physical Exercise Prevent Dementia?

Evaluation

Walking and Etiology of Dementia

2.3 Review of interventions and Rehabilitation for Dementia

Non-Pharmacological Interventions

Cognitive Training

Randomized Control Trials and Dementia

Review of Dementia Rehabilitation

Occupational therapy for dementia

Drill and practice for memory deficits

Cognitive rehabilitation and Cognitive training

Compensatory memory aids

Augmentative and Alternative Communication

2.4 Assistive Technology for Dementia

Assistive Technology

Low Tech Intervention

High Tech Intervention

Various Assistive Technology

Various Stages of dementia and AT

2.5 Assistive Technology and progression of Dementia

Evaluation for AT

Refusal of AT

Ethical Issues and AT

The Costs and Benefits of AT

Carers' burden and AT

2.6 Policy for Assistive Technology

The use of reminder systems e.g. medication

2.7 References

The Chapter 3 Low Tech Intervention by Non Electronic Tools

3.1 Review of Non-Electronic tool-Assistance

Necessity for Assistive Technology

Memory Aid for the Normal Elderly

Memory Aids for Mild Dementia

Memory Aids for Moderate Dementia

Memory Book

Memory Book for mild Dementia

Memory Book for moderate Dementia

Memory Book for Severe Dementia

Applying Memory Aids

Role of Speech-Language Pathologists and Carers

3.2 Presentation Tools for Memo

Sticky notes

Stationary reminders

Message within the Field of Vision

3.3 Wearing Memory Aids

Wrist Type

Bracelet Type

Neck-tie Type

Brooch Type

Belt Type

One Hand-Writing Type

3.4 Diary and Calendar

Simple Memory Aids

Special Diary for the Memory Impaired and Dementia

3.5 Location Management for Items

Memory Tapestry

3.6 Clothing for Memory

Memory Vest

3.7 Non-Electronic Home Environment

Memory Box

3.8 Summary

3.9 References

Chapter 4 Low Tech Intervention: Assistance by Electronic Devices

4.1 Assistance by Electronic Devices
Purpose of Assistance by Electronic Devices
Review of Assistance by Electronic Devices
Evaluation
Evaluation for ENABLE Project
Summary
4.2 Reminder
Review for Reminder
Reminder Intervention by IC Recorder
New Devices and System for Reminder
4.3 Assistance by other Electronic Devices
Medication reminder box
Locator for lost Items
Monitoring Systems for Safe
Fall-Detection System
Sleep Monitoring
Wandering Monitoring
Wandering Prevention
Reminder at special location
Special Watch and Calendar
Alarm Clock and Timer
Devices for frequent question
Other Devices
4.4 Assistance by Cell-phone, and Smart Phone
Phone
4.5 Researches for Future Assistance
4.6 Summary
4.7 References

Chapter 5. Various Non-Pharmacological Approaches
5.1 Review of various Approaches
Brain exercise
Errorless Learning
Reality Orientation Training
Cognition Oriented Approaches

Cognitive Stimulation Therapy
Simulation Presences Therapy
Doll Therapy
Cognitive Training by Personal Computer
Recreation Therapy
Laughing Therapy
HERMES-Cognitive Care and Guidance for Active Aging
5.2 References

Chapter 6 Reminiscence Therapy and ICT
6.1 Review of Reminiscence Therapy
Reminiscence Therapy and Life Review
Evaluations
Photo Using Reminiscence Therapy
Problems of Reminiscence Therapy
Reminiscence Therapy by Utilizing Tools
6.2 Review of Reminiscence Therapy by Utilizing ICT
Reminiscence Therapy Supported by ICT
Review of Lifelog
Privacy and Lifelog
6.3 Talking Video
6.4 Reminiscence Video
Personalized Reminiscence Photo Videos
Recent Researches on Reminiscence Video
Remote Reminiscence Therapy
6.5 Simple Reminiscence Video
6.6 Group Reminiscence Therapy
6.7 Summary
6.8 References

Chapter 7 Music Therapy and ICT
7.1 Review of Music Therapy

Music and Dementia
Definition of Music Therapy
Review of Music Therapy
Effectiveness of Music Therapy
RCTs study and narrative study for Music Therapy
Review of Music Therapy by applying ICT
7. 2 Behavioral Guidance by Music
7.3 References

Chapter 8 Therapy for Communication and ICT
8.1 Dementia and Communication
Applying Technology for people with cognitive Disabilities
8.2 Vocabulary Data File
Progress of Vocabulary Data File
8.3 Conversation Advantage of Videophone
Applying Videophone for Generic Use
Videophone Conversation for people with Dementia
Remote Reminiscence Conversation Experiment 1
Remote Reminiscence Conversation Experiment 2
Remote Reminiscence Conversation Experiment 3
Remote Reminiscence Conversation Experiment 4
8.4 References

Chapter 9 Daily Assistance by High Tech Interventions
9.1 Review of High tech interventions: Various Projects
Clever Project
INDEPENDENT
Assisted Cognition
Lifeline
MAPS
CIRCA
Progress of CIRCA
Networked Interaction Therapy
COGKNOW

9.2 Scheduling Assistance
Assistance by Videophone
Assistance by Videophone
Review of Other Studies on Scheduling Assistance
9.3 Review of Life Logging Assistance
Wearing Assist system for recording and searching daily behavior
Behavioral Assistance in Night
Passive Infra-Red (PIR) Night Light
Telling System in Night
Electronic display board for use at night
9.4 Assistance for Procedural Behaviors
Dressing Assistance
Cooking Assistance
Cooking Support System
Washing Hand Assistance
COACH
Toilet Assistance System
Bathing Assistance System
9.5 Smart Home 133
Low Tech devises
High Tech Devises
Monitoring System in Residential Homes
9.6 Other Assistance
9.7 References

Chapter 10 Daily Assistance by Virtual Agents and Robots
10.1 Support by Agents System
Necessity of Conversation
Necessity of Agents
Required Functions for Agents
Review of Various Researches on Agents
Conversation Agent for the Elderly
Acceptance of virtual agents by patients
Conversational Agents for Interacting with Patients with Dementia
Grandchild agent
Further application of Grandchild agent
Home living support agent

Review of Other Agent Researches

Walking, Agent and wandering prevention

10.2 Robots

Robots and Aging Society

Review of Robots for Elderly Assistance

The Future of Assistive Technologies for Dementia

10.3 References

Chapter 11 Assisting Dog for People with Dementia

11.1 Animal Assisting Therapy

Dog-Assisted Activity and Dog-Assisted Therapy

Relation Between Dog and Human

11.2 ICT-Wearing Dogs for Dog's Minds

11.3 ICT-Wearing Dogs for Dementia Support

Experiments for Assisting dog

How a Dog Can Prevent a Person from Opening Door

People with Dementia Talking through a Smartphone on a Dog

11.4 References

Table of the Detailed Contents of this Review
